Product Details:

RESURFACE RCF-112 - Central Fade Fine Dots Gradient is a PVC film with a white matte or colour translucent dual fading gradient in a small dot or custom design pattern. Ideal for direct visibility control. This film is designed for application to interior glass, single or double pane and exterior facing glass. Made of durable Polyester Perfect for privacy, decorative or architectural applications. Manufactured with a silicone liner, which protects the clear, pressure-sensitive adhesive and applied using the same tools and techniques for window films.

Product Description :

RESURFACE RCF-112 - Central Fade Dots or Custom Gradient is a polyester film with a white or colour translucent dual fading small dot or custom design gradient pattern.

Installation:

Installation should be in accordance with manufacturer’s installation instructions

Specifications:

Product Code	RCF-112
Product Family	Gradients
Film Type	PVC
Adhesive Type	Solvent poly acrylate
Usage	Interior
Available Height	1520mm (custom height available)
Full Roll Length	10 m rolls
Thickness	70 microns
Shading Coefficient	0.55
Visible Light Reflection	27%
Visible Light Transmission	75%
UV Transmission	2%
Total Solar Energy Rejected	38%
Solar Energy Absorbed	25%
Infra-Red Transmission	70%

Product Construction:

70 micron PVC
